Accident Proof

AQUASTOP - WATER RESISTANT LAMINATE

Swiss Made

Aquastop laminate is all about making life a little less troublesome when accidents happen. We all understand that in our fast paced and hectic lives the unexpected does happen in our home or office environments: from pet accidents to appliance malfunctions and just every day spills, Aquastop laminate is designed to make these events a lot more manageable.

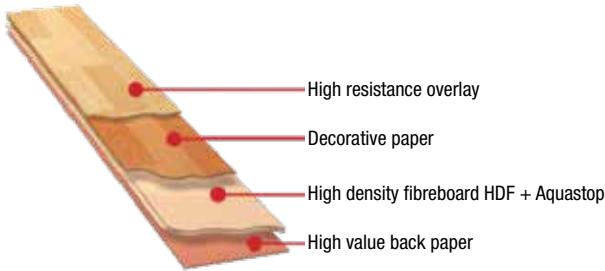

Aquastop is produced by the Swiss Krono Group, one of the world's largest and most respected laminate manufacturers. Aquastop is an innovative laminate technology that delivers a unique set of qualities that is engineered to inhibit moisture ingress from topical liquid spills, water and pet accidents. With your 'Peace of Mind' as a central focus, the 8 & 12mm range allows for moisture exposure for up to 48 hours and the 14mm range presents with 72 hour protection. These time frames will certainly help if the unexpected does happen.

Note: Refer specific install requirements for bathrooms and laundry.

Aquastop laminate is produced to strict world class European standards allowing for healthy living, emissions are the same as you would expect from timber in its natural state. It poses no health risks and makes it highly suitable for young children who spend a lot of time in contact with the floor. In addition its superior abrasion cl. Ac5/33 scratch and impact resistance make it an ideal choice where pets are involved. Swiss Krono laminate products are produced from 100% natural materials with timber sourced from FSC certified forest resources.

Aquastop laminate for Swiss precision, reliability and performance.

ROCK

INTRODUCING THE NEW AUSTRALIAN TIMBER RANGE

Swiss made and now featuring two of Australia's most popular timber choices, Blackbutt and Spotted Gum. Our exclusive Swiss Krono Australian laminate timber range now includes Blackbutt and Spotted Gum, these great colours complement our existing range of Oak and contemporary décors.

With 10 unique visual repeats the finished installation will provide all the warmth and character expected from these two highly sought after timber colours. The Australian Timber décors are available in two thickness ranges: 8mm in 1380mm planks and 1845mm Long Planks for the 12mm range.

Australian timber décors and renowned Swiss precision, what more could you ask for?

ANY SETTING.

8mm AC5 V4 MICRO BEVEL

Swiss Krono 8mm Aquastop is engineered to withstand topical moisture such as everyday household spills for at least 48 hours. Still, if detected promptly remove all liquid spills, including pet urine and never flood the floor with water. As with all wood based products, even Swiss Krono Aquastop with its increased moisture resistance will react to the moisture in the environment and as a result will expand or contract accordingly. Although it has been designed for improved performance against water/moisture ingress it is not waterproof and excessive wetting is to be avoided. Do not use Steam Mops.

CARE & INSTALL

Installation in Bathrooms & Wet Areas

To maximise the water resistant performance of AQUASTOP laminate the following installation method must be followed in any area that could be subject to moisture, such as bathrooms or laundry areas. You must seal the locking mechanisms at the junction where the click profiles join as you install the laminate flooring. You can buy a laminate floor sealant (**Dunlop Click Seal**) at most home improvement stores. In addition, a mould resistant waterproof silicon sealant should be used to completely fill all of the expansion joints around the perimeter of the wet area floor. This will prevent water moving from the floor surface to the underside of the planks which could cause the floor to fail. The wet area floor should not be joined to a floor surface in an adjoining room. The wet area should be terminated with a transition trim and sealed appropriately. **These additional instructions only apply for wet area locations.**

Care & Maintenance

AQUASTOP laminate floors are very easy to care for without the need for specialised cleaning agents nor any subsequent treatment after installation. A vacuum cleaner or the occasional moist mop is perfectly adequate.

This saves not only time and money, but also eliminates the use of chemicals in the household.

Although laminate floors are highly resistant, they are not indestructible. The following simple precautions will help protect the laminate floor from scratches and other damage:

- Use dirt & grit absorbing mats in the entrance area
- Quickly remove all dirt, sand, grit, and other foreign bodies with regular cleaning
- Fit furniture, and especially chairs with felt pads
- Immediately wipe up spilled liquids
- Use office chairs with soft casters or on protective mats

Regular Cleaning

Aquastop can be cleaned with a wet mop. We recommend the use of a vacuum cleaner, soft bristle broom or a dust mop for regular cleaning. If necessary, the floor may be cleaned with a wet mop, avoid using too much water. Do not pour liquid directly on the floor or use an excessively wet mop that will leave a puddle of water standing on the floor. Avoid using regular household cleaners or scouring pads as they are abrasive and will damage your floor. Do not use Steam Mops under any circumstance.

TECHNICAL SPECIFICATIONS

CHARACTERISTICS

Attractive

Available in Australian Timber and authentic Oak colour tones from light to dark and individual, distinguished planks. A floor of timeless beauty to enrich any interior.

Innovative

Looks and feels like a precious hardwood floor – unrivalled in depth and precision of how the structure meets perfectly with the decor. Produced with the latest embossing technology. Micro-bevel edges for enhanced wide plank visual.

Healthy

Produced to strict world class standards. For healthy living, emissions of vapours are the same as you would expect from wood in its natural state.

Ecological

Produced at the most modern, environment-friendly production facility of its kind.

Resilient

Superior abrasion, scratch & impact resistance as well as colourfast (anti-fade) & anti-static properties.

Affordable

Unbeatable Price vs Performance ratio compared to traditional hardwood floors. Great value for money with long-term cost savings making it the ideal choice for your flooring solution. It's a low maintenance and easy to care flooring, there is no need to wax or polish and it will stay looking like the day you installed it for many years to come.
